EDUCATION

BRAC University **Dhaka, Bangladesh**

B.Sc. in Computer Science and Engineering, CGPA: 3.65/4.00 *August 2022 – August 2026*

TECHNICAL SKILLS

Machine Learning: Linear & Logistic Regression, Decision Trees, Random Forest, Gradient Boosting, SVM, KNN, K-Means, Model Evaluation & Hyperparameter Tuning

Deep Learning: CNNs, U-Net & Attention U-Net, RNNs, LSTMs, Natural Language Processing (NLP)

ML Libraries: NumPy, pandas, Scikit-learn, PyTorch, TensorFlow.js

Data Analysis & BI: Excel, Power BI, SQL, Exploratory Data Analysis (EDA), Data Visualization

Databases: MySQL, PostgreSQL, MongoDB, Firebase

Web Development: React.js, Node.js, Express.js, RESTful APIs, JWT Authentication

Tools & Platforms: Git, GitHub, Kaggle, Vercel, Netlify, Postman, Competitive Programming (LeetCode)

PROJECTS

Jailbreak Attack Prompt Classification | *NLP Project* Live Demo GitHub

- Built an end-to-end NLP pipeline to classify 28,000 adversarial LLM jailbreak prompts into 16 safety-policy categories, benchmarking 10 models across TF-IDF, Word2Vec/GloVe, and fine-tuned BERT.
- Achieved 0.89 accuracy and Macro-F1 with a soft-voting ensemble, and identified a label-leakage issue through an input-ablation study before deploying the pipeline as a Streamlit web app.
- *Tech Stack: Python, TF-IDF, BERT, GRU/LSTM, Scikit-learn, Streamlit*

PetSegNet – Joint Pet Segmentation & Breed Classification | *Deep Learning* GitHub

- Designed and trained a shared encoder–decoder U-Net performing simultaneous binary pet segmentation and 37-class breed classification on the Oxford-IIIT Pet Dataset (˜7,400 images).
- Implemented and benchmarked a Base U-Net and an Attention U-Net with attention gates at every skip connection, evaluated using Mean IoU, Dice Score, and macro F1.
- *Tech Stack: PyTorch, Albumentations, OpenCV, NumPy*

EpiWatch BD – AI Epidemic Early-Warning System | *Full-Stack + Applied ML* GitHub

- Built a district-level disease outbreak prediction system for Bangladesh's 64 districts using a Scikit-learn RandomForestRegressor trained on environmental signals.
- Developed a Python Flask AI microservice for risk scoring and Bangla + English NLP news classification, integrated with a React/Leaflet frontend for real-time epidemic risk maps.
- *Tech Stack: Python, Flask, Scikit-learn, Node.js, MongoDB, React, Leaflet*

BRACU Research Thesis Management Portal Live Project GitHub

- Built a full-stack thesis management portal automating proposal submission, supervisor matching, meeting scheduling, and archiving across Student, Supervisor, and Admin roles with JWT-protected routes.
- Integrated the arXiv academic paper API enabling paper search, saving, and supervisor recommendations to student groups, along with Admin controls for semester setup and milestone deadlines.
- *Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT*

CERTIFICATIONS

- AI/ML Expert – Phitron
- Complete Web Development Course (MERN Stack) – Programming Hero
